

Catálogo y Tabla de Aplicaciones 2018

Líder mundial en iluminación automotriz

Línea de focos automotrices

Light is OSRAM

OSRAM

Simplemente la mejor solución

OSRAM cuenta con el foco perfecto para vehículos para cada uso y cada necesidad, en automóviles, motocicletas, camiones, ya sea de LED, de xenón o halógeno, pensado para conductores que buscan rendimiento y diseño.

Glosario de los términos de iluminación más importantes

Flujo luminoso Φ

Unidad de medida: lumen [lm]

Flujo luminoso Φ es la potencia total radiada emitida por una fuente luminosa evaluada con la sensibilidad espectral del ojo y el equivalente de radiación fotométrica K_m .

Flujo luminoso Φ es la intensidad luminosa I emitida en todo el ángulo sólido Ω .

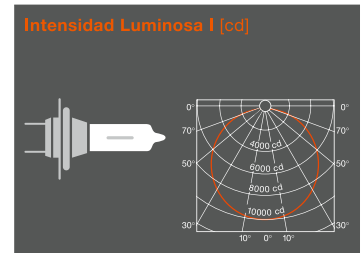

Intensidad luminosa I

Unidad de medida: candela [cd]

En general, una fuente de luz emite su flujo luminoso Φ en diferentes direcciones y con diferentes intensidades. La intensidad luminosa es el flujo luminoso irradiado en una dirección específica (ángulo sólido Ω).

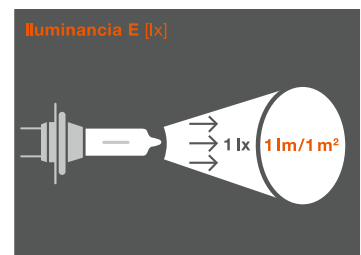

Diagrama polar.

Iluminancia E

Unidad de medida: lux [lx]

La iluminancia E es la relación entre el flujo luminoso y el área iluminada. Una iluminancia de 1 lx ocurre cuando un flujo luminoso de 1 lm es uniformemente distribuido sobre un área de 1 m².

Luminance L

Unidad de medida: candela por metro cuadrado [cd / m²].

La luminancia L de una fuente de luz o un área iluminada es una medida de la impresión de brillo.

Eficacia luminosa η

Unidad de medida: lúmenes por vatio [lm / W].

La eficacia luminosa η indica la eficiencia con la que la energía eléctrica consumida se convierte en luz.

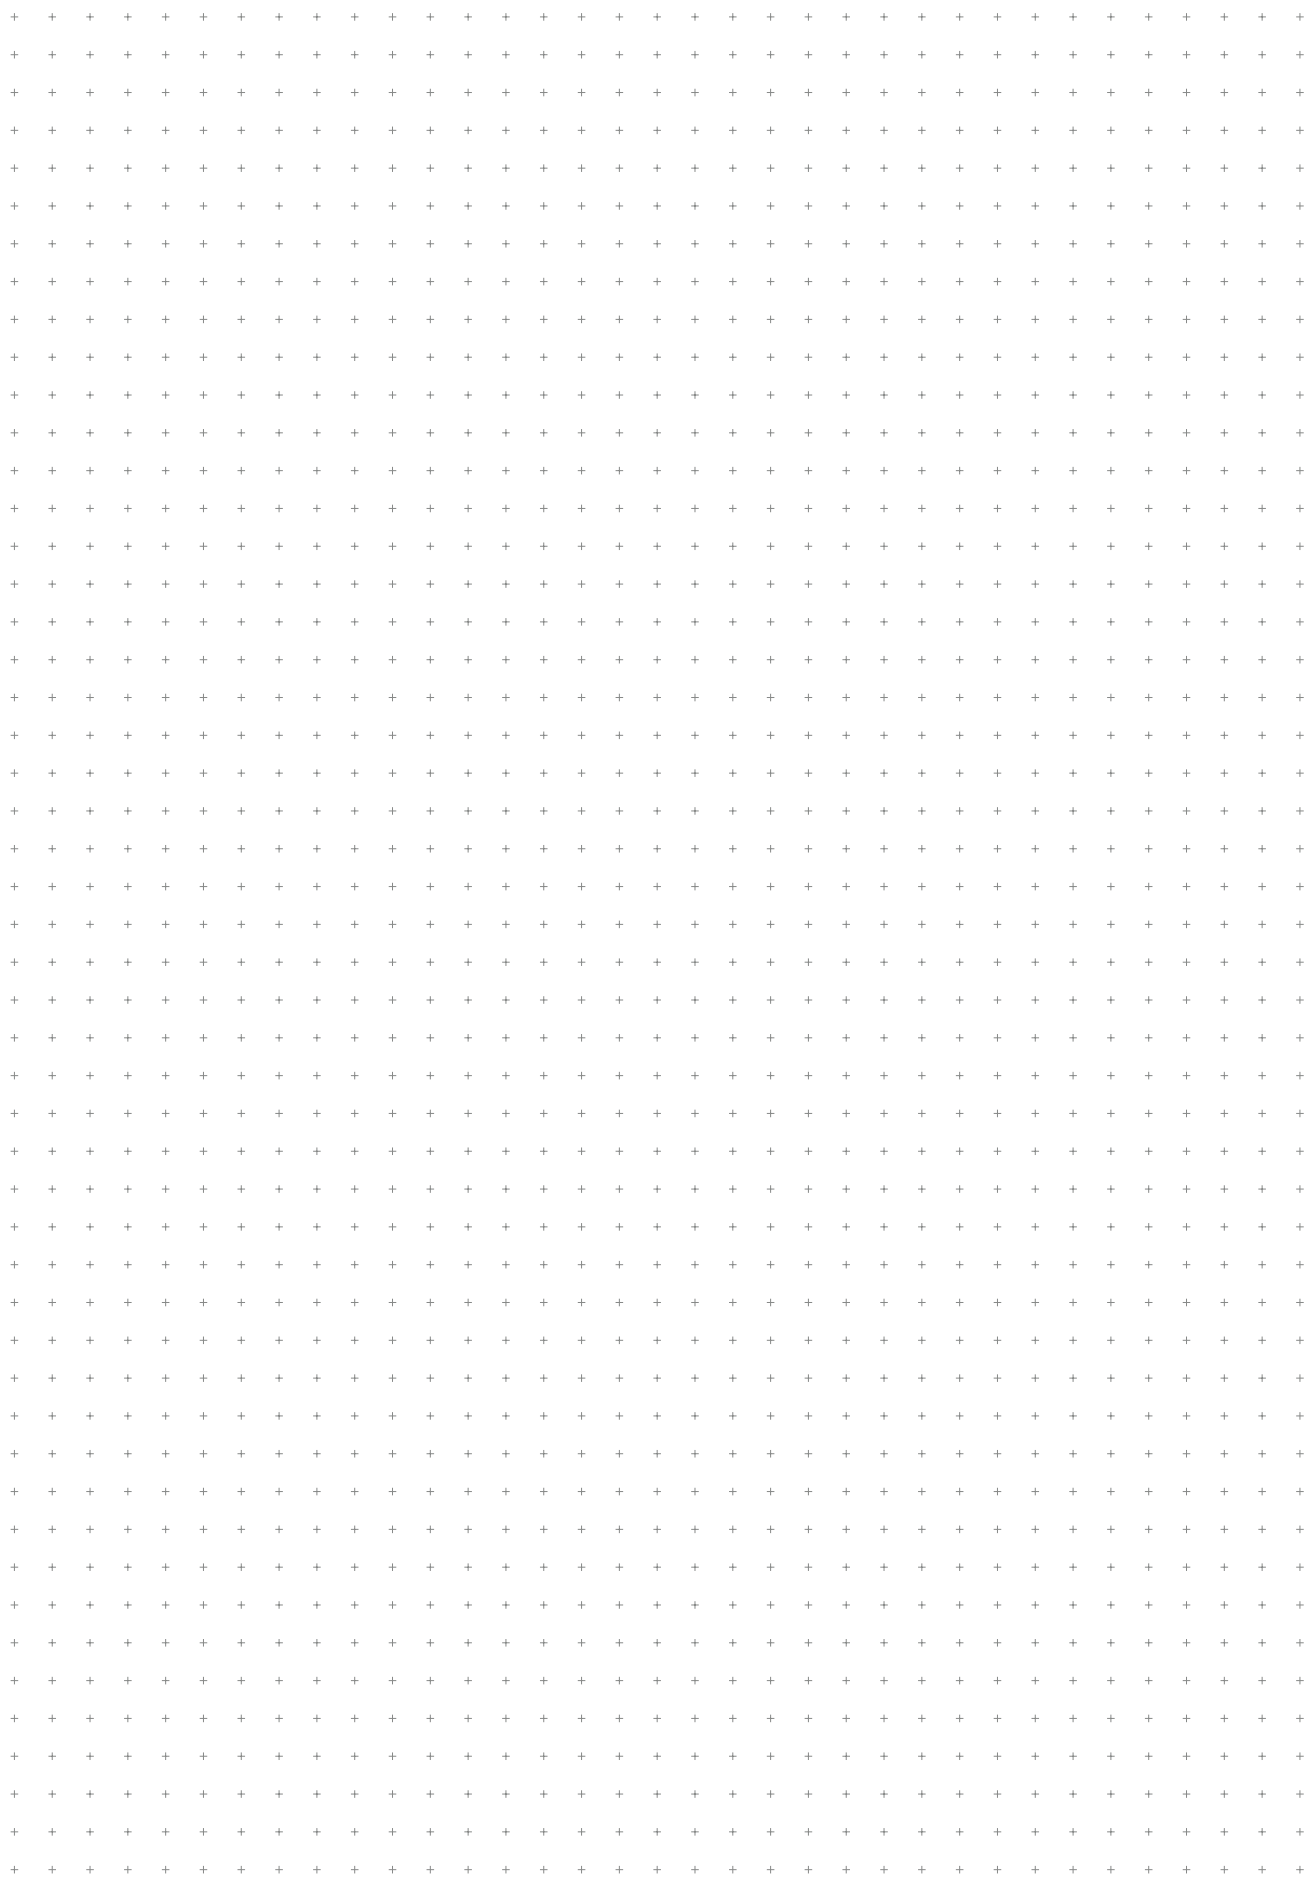

Temperatura del color

Unidad de medida: Kelvin [K]

La temperatura de color de una fuente de luz se define en comparación con un "radiador de cuerpo negro" y trazado en lo que se conoce como la "curva de Planck". Cuanto mayor es la temperatura de este radiador de cuerpo negro, mayor será el componente azul en el espectro y menor será el componente rojo.

Vida útil del foco

El valor de la vida útil B_3 representa la tasa de fallo prematura de los focos. Esto significa que el 3% de todas los focos probados habrán fallado después de este número de horas de combustión. El valor de vida útil T_0 representa la tasa de fallos del 63.2% de los focos.

Las 200 mejores razones para usar OSRAM

La número 1 en todo el mundo

En promedio, se instalan alrededor de 200 focos en cada automóvil, son 200 veces la calidad superior de OSRAM, el líder mundial en soluciones de iluminación en su vehículo. OSRAM es un líder en innovación y tecnología, y vende el volumen más alto de focos en el creciente mercado de OEM para automóviles, así como en el mercado de rápida expansión para los focos de repuesto.

Calidad de marca original: cerca del cliente

OSRAM ofrece calidad de OEM y al hacerlo excede todas las normas mínimas ECE, ya que las soluciones de iluminación se producen de acuerdo con los estrictos requisitos de los fabricantes de automóviles. Los talleres y los usuarios finales pueden ver los productos de OSRAM por sí mismos en ferias y eventos comerciales, y la experiencia de soluciones innovadoras de productos exhibidos en los vehículos.

Calidad totalmente certificada “Hecho en Alemania”

Los mejores técnicos e ingenieros están en constante investigación y desarrollo en las instalaciones de OSRAM en Alemania. OSRAM es el socio de desarrollo de todos los principales fabricantes de faros; la gestión de la calidad de OSRAM está certificada según ISO 9001 y las luces de los vehículos se certifican según TS 16949. Las soluciones inteligentes de iluminación y la calidad constante y rígida de los productos sólo son posibles gracias a esta certificación. Es por ello que entre los clientes de OSRAM están los principales fabricantes de automóviles del mundo, y también es por ello que OSRAM es una de las marcas más conocidas.

La mejor iluminación para una visión aún mejor

El desarrollo continuo de los focos automotrices para proporcionar una mejor visión de la carretera a los conductores y brindar una percepción más aguda a los usuarios de la carretera es siempre el centro de atención en OSRAM. Las luces del faro con una calidad excepcional iluminan uniformemente el campo de visión de 50 a 75 metros delante del vehículo. Sin embargo, muchos faros de OSRAM iluminan a una distancia considerablemente mayor, de modo que se pueden identificar con mayor anticipación las señales, otros vehículos y obstáculos.

Confianza a través del monitoreo

Las imitaciones de los productos de OSRAM no son sólo un problema comercial, sino también un riesgo para la seguridad de nuestros clientes. Los productos más frecuentemente imitados son los de Xenón de OSRAM. Para disminuir considerablemente el número de copias, OSRAM ha desarrollado el Programa de Confianza de OSRAM, que los propios clientes pueden usar para comprobar si tienen un producto original de OSRAM.

OSRAM: sostenible por principio

La protección del medio ambiente en OSRAM va más allá del cumplimiento de la ley: la producción de OSRAM es eficiente en cuanto a recursos, está dirigida a conservar la energía y reduce los materiales de empaque. Esto se garantiza de manera uniforme y continua por un sistema de gestión ambiental que cumple con la norma ISO 14001.

Nuevo Empaque OSRAM.
Más información, más atractivo.

Códigos de color de empaque de OSRAM Encuentra el tuyo

Así como hay diferentes tipos de vehículos, también existen diferentes tipos de conductores. Y también hay diferentes razones para comprar focos para tu vehículo. Algunos conductores siempre buscan las últimas innovaciones, algunos necesitan un rendimiento ideal, otros le dan más importancia al diseño y estilo, y algunos prefieren productos de larga vida útil o simplemente buscan la calidad de un repuesto original. Gracias a los nuevos empaques para los focos automotrices, luminarias e innovaciones de LED de OSRAM, con un nuevo sistema claro y comprensible de codificación por color, se atienden perfectamente a todas estas demandas y diferentes tipos de cliente.

INNOVACIÓN

Color negro y plateado neutro, para seguir siendo innovadores y siempre estar un paso adelante.

DESEMPEÑO

Color rojo oscuro e intenso, indicando la "Calidad de OSRAM" en busca de la perfección. Fuerte, líder, calidad superior.

DISEÑO

Color azul en tonos fríos para indicar la creatividad, la originalidad y la individualidad. Un color que destaca.

CONFORT

Un verde moderno que refleja la economía armoniosa, equilibrando modernidad y respeto al medio ambiente.

ORIGINAL

Brillante "NARANJA OSRAM" sobre un fondo blanco, indicando la calidad de confianza. Una clara asociación con la marca.

Beneficios para sus clientes

- Más y mejor comunicación orientada al cliente
- Excelente guía para el cliente, con un diseño de empaque coherente.
- Información eficaz creada por iconos modernos y claramente comprensibles
- Podrán localizar el producto adecuado a sus necesidades más fácilmente

Beneficios para su negocios de iluminación

- Aumento de las ventas, diseño más atractivo, y una buena visibilidad en el estante.
- Mayor atracción, aceptación de relación calidad y precio – consistencia para todos los productos, desde el reemplazo de equipo original, hasta los de valor añadido.
- Aumento de la aceptación por parte de los consumidores y generación de ingresos extras destacando las ventajas y el rápido reconocimiento de los productos de valor añadido.

Póngase en contacto con nosotros y sepa más sobre el nuevo concepto de empaques de OSRAM: www.osram.com/the-perfect-match

Sea cual sea la forma en que lo mire: Sorprendentemente atractivo e informativo

El nuevo diseño de empaque de OSRAM tiene un doble efecto: capta la atención desde la distancia y ofrece información clara y persuasiva cuando se ve de cerca, de acuerdo al lema “menos es más”.

Frente. Información clave de un vistazo

La referencia ECE, el voltaje y la potencia se muestran claramente en la esquina superior izquierda como los principales criterios de búsqueda. En la gama de LED, se utiliza este espacio para destacar la tecnología y la referencia.

El nombre de la marca y la placa de color naranja, como un sello de calidad, se destacan colocándose en la parte superior del empaque.

Reconocimiento instantáneo de los beneficios del producto y el valor añadido, gracias a los grandes iconos que resaltan los valores esenciales de cada producto.

El nombre de la familia de productos se muestra claramente.

El tipo de vehículo (AUTOMÓVIL, MOTOCICLETA, O CAMIÓN) se muestra de manera prominente y clara con un icono en la esquina superior derecha.

El nivel de desempeño es definido por el velocímetro. Por lo tanto, el número de segmentos plateados en el velocímetro cambia dependiendo del valor añadido de los productos para identificar los diferentes productos en una misma familia.

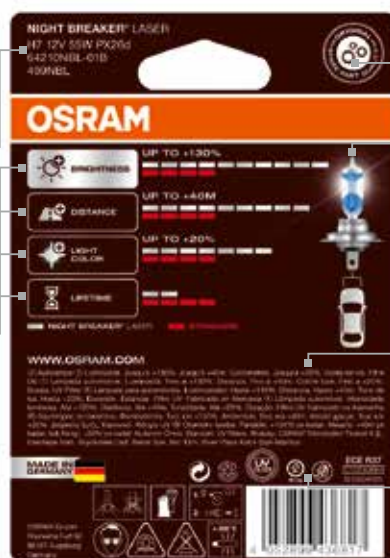

El producto siempre es claramente visible, ya sea como una foto o en una ventana.

Cada segmento es representado por un vehículo que diferencia las familias de productos para destacarse y generar el reconocimiento. Además, se hace énfasis en el tipo de transporte, AUTOMÓVIL, MOTOCICLETA O CAMIÓN.

Posterior Aún más información de un segundo vistazo

Tipo y referencias.

El valor añadido del producto en comparación con el producto estándar se explica en pictogramas: comparación de la intensidad luminosa, longitud del haz de luz, el color de la luz y la vida útil. En la gama de LEDs, se utiliza este espacio para las notas de aplicación, información técnica o instrucciones de instalación.

Indicador de calidad – repuesto original con la calidad de OEM.

Visualización clara del producto y la aplicación correspondiente. Siempre se debe reemplazar en pares.

El texto y código de barras exigidos a nivel regional para que el consumidor tenga la información ideal. Cambios según la región debido a diferentes exigencias regionales.

Notas de aplicación, información de seguridad y pictogramas obligatorios.

El diseño que se muestra aquí para un blíster es el mismo para todos los demás empaques de productos de OSRAM Automotriz.

El sistema extendido: también es sencillo y sofisticado

El nuevo concepto de empaque atractivo permite que la gama de OSRAM Automotriz se presente con un aspecto aún más moderno, llamativo y dirigido al cliente. La nueva codificación de colores, que es clara y basada en diferentes “tipos de clientes”, facilita que se lleven los clientes al producto correcto, con una visualización eficaz del valor añadido y una clara diferenciación de las diversas tecnologías. Por supuesto, el nuevo sistema de embalaje no se limita a los focos para automóviles, sino también incluye focos para motocicletas y camiones, así como las últimas innovaciones de los productos de LED.

1. Diseño uniforme

Nuevo diseño para todo tipo de empaque

- Cajas plegables, blísters y nuestras nuevas cajas dúo optimizadas

Ya no se realiza la segmentación de color por vehículo

- Aspecto uniforme para todos los tipos de vehículos dentro de un segmento
- Imagen en el velocímetro y un icono en la esquina superior derecha, según el vehículo
- El cliente encuentra la información siempre en el mismo lugar

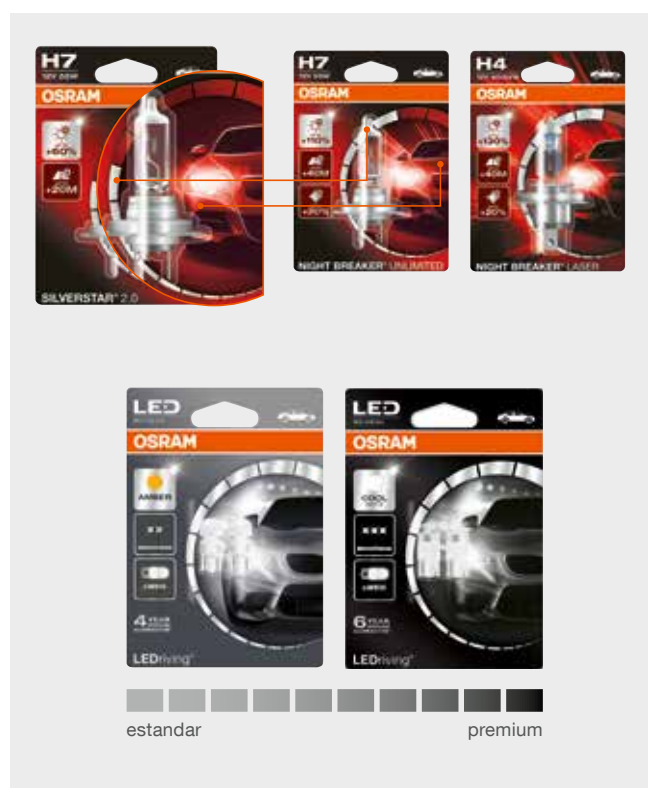

2. Visualización eficaz del nivel potencial del tipo de tecnología

Diferenciación a través de imágenes y del velocímetro

- El valor añadido es indicado visualmente por un cambio de la imagen (más “rayos de luz”) y del velocímetro (más segmentos de color plateado).
- Para los productos de LED, la escala de color del empaque también cambia.

3. Diferenciación de las tecnologías de xenón y halógeno

Los productos de xenón se diferencian por tener una placa plateada que muestra el cambio de la tecnología.

LEDs en el vehículo. versátil, elegante, individual

La gama de productos versátiles e innovadores de LED de OSRAM es muy amplia e individual, ya que permite a cualquiera crear su propio ambiente de iluminación personal en un vehículo con ambientes de color, algunos de ellos controlables a través de una app. Además de estas opciones de personalización, OSRAM ofrece una amplia gama de accesorios tales como luces de inspección y elegantes luces de lectura para el interior de los vehículos, así como faros antiniebla adaptables y luces de conducción diurna.

Faro LEDriving® XENARC®

El rediseño del Golf VI hazlo fácil y legal

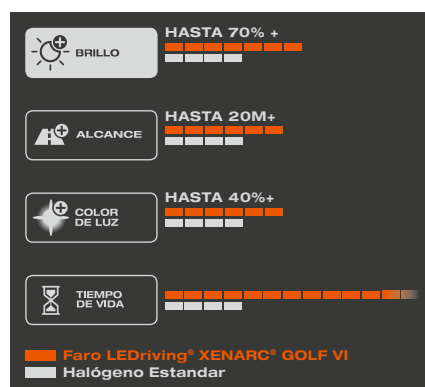

Con su diseño destacado, el faro LEDriving® XENARC® combina la moderna función de luz diurna de LED con un potente foco de xenón. Con este faro, OSRAM ofrece una solución para todos los modelos de Golf VI que no se suministran con faros de xenón. La mejora del faro LEDriving® XENARC® es aprobado por la ECE, cumple con todos los requisitos legales, sin la necesidad de instalar un nivelador automático o un sistema de limpieza de faros.

LEDriving® XENARC® Golf VI GTI Edition
(LEDHL102-GTI)

Principales ventajas

- Dos años de garantía¹⁾
- Óptica sin píxeles gracias a la tecnología última generación de guía de luz
- Haz de luz hasta 20 m más largo²⁾
- Luz hasta un 5% más blanca²⁾
- No se necesita ningún ajuste extra del nivel de haz de luz ni un sistema de limpieza de faros
- Fácil instalación plug and play sin modificar ni dañar los cables existentes
- No se necesitan piezas extras para la instalación
- No se necesita un registro extra (certificado por ECE)

Luces de conducción diurna OSRAM LEDriving®

Detalles elegantes para faros de última generación

Soluciones innovadoras de guías de luz y de píxeles, que son fáciles de instalar y brindan tecnología LED de alta calidad para un bajo consumo de energía y una larga vida útil: Las luces diurnas de conducción LEDriving® son la opción correcta para los conductores que quieren aumentar la visibilidad durante el día y que se interesan por el diseño y por destacar su vehículo.

Principales ventajas de LightGuide (LEDDRL102)

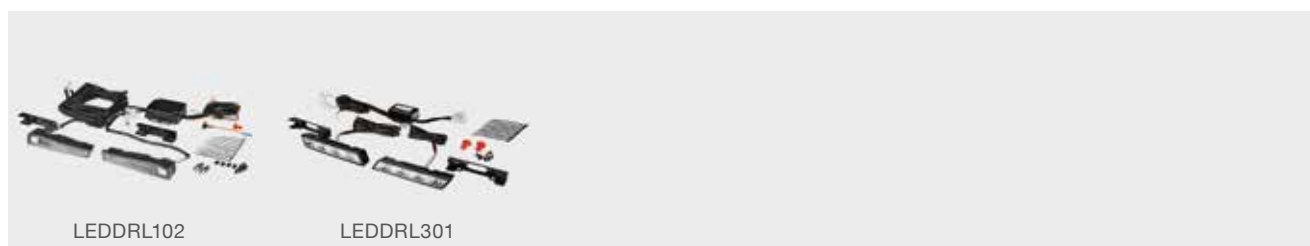

- Cinco años de garantía¹⁾
- Luz diurna de conducción de LED, incluso la luz de posición
- Brillo sin píxeles, y curvas dinámicas
- Temperaturas de color hasta 6.000 K
- Larga vida útil, hasta 5.000 h
- Regulable
- Bajo consumo de energía
- Instalación sencilla
- Tecnología OEM
- Compatible con el sistema de star-stop y con vehículos híbridos

Principales ventajas de PX-5²⁾ (LEDDRL301)

- Tres años de garantía¹⁾
- Aspecto dinámico gracias a la tecnología de facetado óptico y la tecnología de píxeles punteados
- Temperaturas de color hasta 5.200 K
- Instalación sencilla

Luces antiniebla OSRAM LEDriving®

Mejor vista, mejor apariencia

Las luces antiniebla LEDriving® ofrecen opciones de LED brillantes para los aficionados por el tuning y la tecnología. Mejorando tanto la visibilidad como el estilo, complementan perfectamente los faros delanteros. Están disponibles soportes de montaje extras para instalar faros antiniebla LEDriving® en diferentes modelos de automóviles.

Principales ventajas de FOG¹⁾ (LEDFOG101)

- Cinco años de garantía²⁾
- Faros antiniebla con la función de luz diurna de conducción
- Lente resistente a los impactos de gravilla, según ASTM D256 e ISO 179
- Funcionamiento automático gracias al control inteligente
- Temperaturas de color hasta 6.000 K
- Larga vida útil, hasta 5.000 h
- Bajo consumo de energía
- Instalación sencilla
- Adecuados para los sistemas de suministro de energía de a bordo de 12 V y 24 V
- Tecnología OEM

Principales ventajas del soporte de montaje

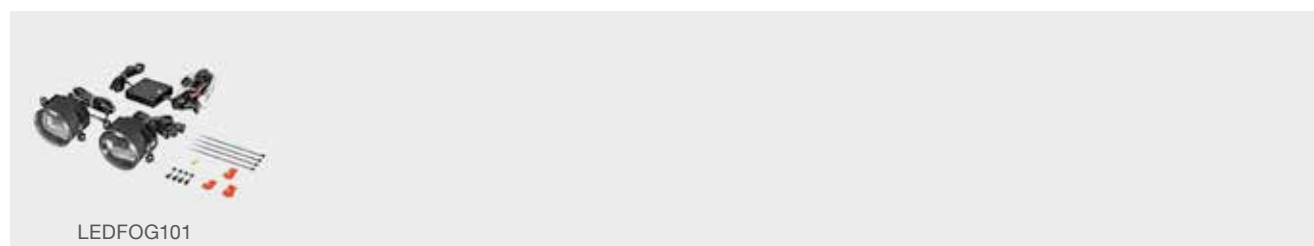

- Dos años de garantía²⁾
- Disponible para: Los modelos de automóviles de Toyota, Volkswagen, Nissan e Infiniti
- Se adapta a la mayoría de los modelos de automóviles con luces antiniebla de 90 mm

¡Compruebe la compatibilidad con su auto!

- Tres años de garantía²⁾
- Luz antiniebla de LED
- Lente resistente a los impactos de gravas, según ASTM D256 e ISO 179
- Temperaturas de color hasta 6.000 K
- Larga vida útil, hasta 5.000 h
- Instalación sencilla gracias a la caja de control incorporada

Principales ventajas del soporte de montaje

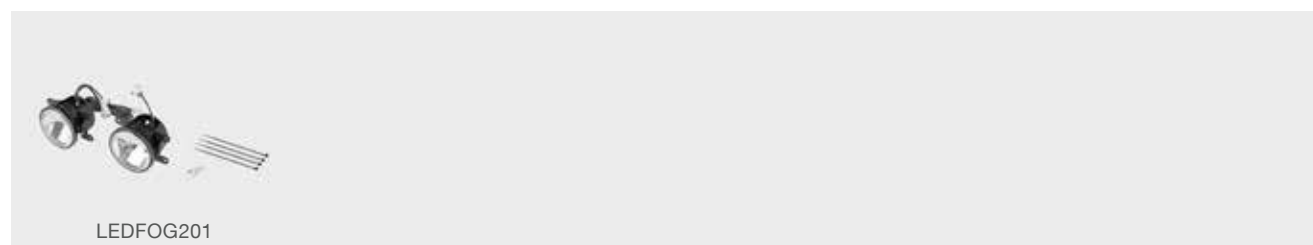

- Dos años de garantía²⁾
- Disponible para: Los modelos de automóviles de Toyota, Volkswagen, Nissan e Infiniti
- Se adapta a la mayoría de los modelos de automóviles con luces antiniebla de 90 mm

¡Compruebe la compatibilidad con su auto!

OSRAM LEDriving® FOG LAMPs

La luz es la máxima visibilidad

Con la tecnología LED y una temperatura de color de 6,000K, la OSRAM LEDriving FOG LAMP representa la solución más conveniente para mejorar sus luces de niebla, ofreciendo un aspecto claro y elegante, así como una mejor visibilidad para todo lo que está delante de usted. Puede instalarlos en lugar de la mayoría de los bulbos de niebla H8, H11 y H16 y la instalación en sí, es muy simple. La luz de niebla viene con la garantía OSRAM de 5 años y gracias a la avanzada tecnología de flujo de aire, ofrece una larga vida útil.

Principales ventajas¹⁾

- 5 años de garantía²⁾.
- Sustitución de LED para las luces de neblina convencionales H8, H11 y H16.
- Temperatura de color de 6.000K.
- Luz blanca brillante para una mejor visibilidad.
- Tecnología avanzada de flujo de aire para una vida útil más larga.
- Sin reflejos gracias a una distribución de luz optimizada.
- Tonalidad de color perfecta y en armonía con faros de xenón y LED.

Gama de productos OSRAM LEDriving® FOG LAMPs¹⁾

Reemplazos directos OSRAM LEDriving®

Amplia gama de diferentes colores

Perfectas para una gran variedad de aplicaciones, los reemplazos premium LEDriving® OSRAM, iluminan la parte interna y externa de los vehículos con altas temperaturas de color de hasta 6,000 K. Gracias a la distribución homogénea de la luz, la iluminación no es selectiva. Los retrofits LED de OSRAM vienen con componentes de fácil instalación (plug and play), proporcionando larga vida útil, bajo consumo de energía, y 100% más estilo.

Principales ventajas¹⁾²⁾

- Seis años de garantía³⁾
- Luz de LED perfecta gracias al moderno material difusor
- Iluminación no selectiva gracias a una distribución homogénea de la luz
- Una amplia gama de diferentes colores de luces para varias opciones de personalización
- A prueba de golpes y vibraciones
- Consumo de energía hasta un 80% menor⁴⁾
- Sencillo reemplazo plug & play

UNIDAD DE CONTROL OSRAM LEDriving® CANBUS

Para una correcta instalación de los LED

Los focos de LED no sólo se ven muy bien, sino también brindan mucha eficiencia energética. Pero sus potencias (watts) más bajas generan advertencias en la computadora a bordo. La solución de OSRAM es la Unidad de Control Canbus. Evita las advertencias y permite que la fuente de luz se enfríe y mantenga su brillo. Basta con fijar el cancelador de advertencias entre el foco y el conector, y disfrute de todos los beneficios de sus accesorios y faros antiniebla de LED de OSRAM.

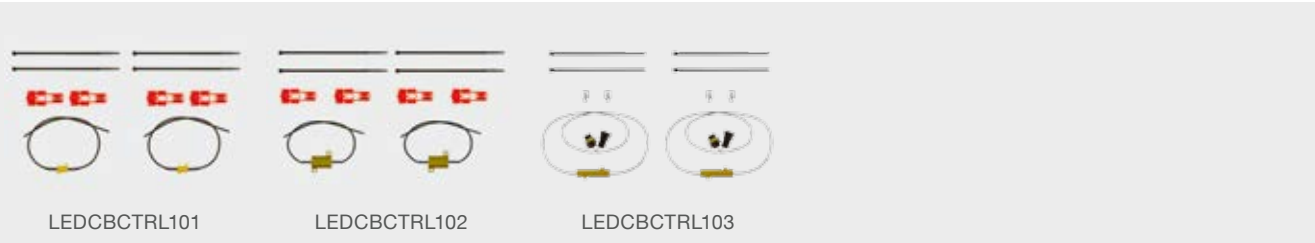

Principales ventajas

- Tres años de garantía¹.
- Evita el sistema de detección de interrupciones del vehículo para evitar los mensajes de error en las computadoras de a bordo, provocados por los focos de LED con potencias más bajas, como 4-5 W, 21 W o 50 W.
- Se fija fácilmente en los cables.
- Fácil de instalar.

Luces de advertencia OSRAM LEDguardian®

Lista para situaciones difíciles

Dos luces que lo deben acompañar a cada viaje. ROAD FLARE es una potente bengala de emergencia para señalar situaciones adversas y mejorar la visibilidad. SAVER LIGHT es una linterna multifuncional que incluye un cortador de cinturón de seguridad, un martillo salvavidas y luces intermitentes de advertencia de LED.

Principales ventajas de LEDguardian® ROAD FLARE¹⁾

- Dos años de garantía²⁾.
- Dos modos diferentes y una función de linterna en un solo producto.
- Equipado con 16 LED de larga duración y alta calidad (12 LED de color ámbar, 4 LED blancos).
- Dos modos: luz amarilla, intermitente y continua.
- Función de linterna: luz blanca.
- Visible a una distancia de hasta 240 m.
- A prueba de aplastamiento no se rompe incluso cuando es atropellado por un coche³⁾.
- Fijado a través de imán en la parte posterior y la hebilla de llaves.

Principales ventajas de LEDguardian® SAVER LIGHT PLUS¹⁾

- Dos años de garantía²⁾.
- De fácil agarre y superficie resistente a la suciedad.
- Martillo de emergencia.
- Cuchillo para cortar el cinturón de seguridad.
- Equipado con doce LED duraderos de alta calidad.
- Doce LED intermitentes de color ámbar en el mango como luces de advertencia.
- Función de linterna: luz blanca. Soporte incluido para montaje en el coche.
- Tres imanes incluidos para fijación en superficies metálicas.

Focos halógenos para automoviles. La luz clásica más popular, por una buena razón

Larga vida útil o alto rendimiento, iluminación optimizada, la mejor calidad, relación convincente entre precio y rendimiento. Por estas excelentes razones, las soluciones halógenas de OSRAM son los clásicos más vendidos entre los focos para faros. Entre los productos originales, de rendimiento, diseño y para el confort, cada cliente puede elegir el foco exacto que mejor se adapte a sus necesidades personales, si se trata de una pieza original de repuesto o un producto de valor añadido.

OSRAM NIGHT BREAKER® LASER

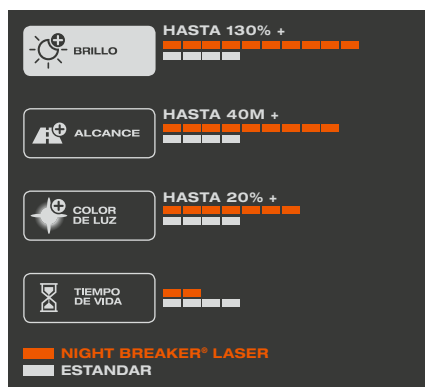

La luz halógena más brillante de OSRAM

Eclipsa a todas los demás focos halógenos de OSRAM: La tecnología innovadora de ablación por láser hace que la NIGHT BREAKER® LASER sea hasta un 130% más brillante que los focos estándar.

Principales ventajas

- Hasta un 130% más luz¹⁾
- Haz de luz hasta 40 m más largo¹⁾
- Luz hasta un 20% más blanca¹⁾
- La innovadora tecnología de ablación por láser y una ventana precisa para un mejor rendimiento
- Una combinación de filamentos de alta ingeniería y llenado de gas xenón puro para aumentar la salida de luz
- Diseño exclusivo con el nombre del producto grabado con láser, y una tapa de plata

OSRAM COOL BLUE® INTENSE

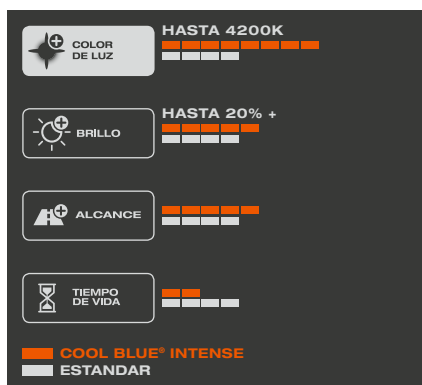

Luz blanca azulada para un aspecto de xenón

Elegante aspecto de xenón y seguridad extra: Foco halógeno de alta tecnología, casi en la clase de los focos de xenón, con su poderosa luz blanca azulada.

Principales ventajas

- Luz blanca azulada para un aspecto de xenón
- Temperaturas de color hasta 4.200 K
- Hasta un 20% más brillante¹⁾
- Diseño moderno con una tapa de plata (H4/H7/H11/HB4)
- Ideal para usar con faros de cristal transparente
- **W5W con temperaturas de color de hasta 3.700 K (± 200 K)**
 - Apariencia de color más homogénea en combinación con los sistemas HID
 - Para iluminación de interiores/ luz de estacionamiento/placa de matrícula, intercambiable con las bombillas estándar

OSRAM DIADEM® CHROME and DIADEM®

Sólo ámbar o roja durante el funcionamiento

Tuneado visual para las luces indicadoras y traseras: Las luces de señal sólo emiten luz ámbar o roja durante el funcionamiento. Entonces, es el complemento luminoso perfecto y atractivo para faros halógenos y de xenón.

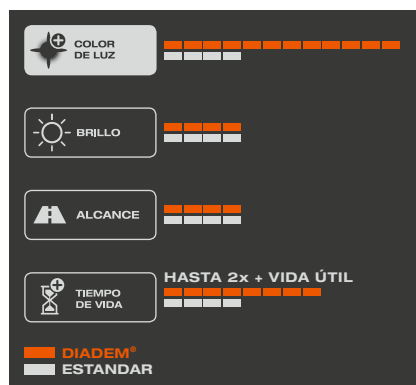

Principales ventajas: DIADEM® CHROME

- Sólo ámbar durante el funcionamiento; de lo contrario, es casi invisible
- Cromado gracias a la interferencia más avanzada y al revestimiento absorbente
- Diseño exclusivo
- Sin efectos de color irritantes
- Ideal para todas las luces indicadoras con tapas transparentes

Principales ventajas: DIADEM®

- Focos con emisión de luz ámbar o roja
- Apariencia opalescente gracias al revestimiento de interferencia más avanzada
- Ideal para todas las luces indicadoras con tapas transparentes
- Hasta el doble de la vida útil¹⁾

OSRAM ULTRA LIFE

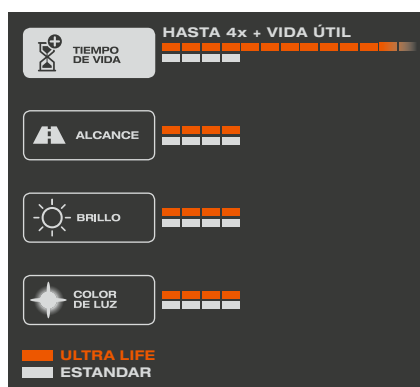

Mayor vida útil y garantía de cuatro años

La familia de productos ULTRA LIFE mejorada ofrece mayor confort en la conducción, comodidad y durabilidad. Los focos duran hasta cuatro veces más en comparación con los focos de faros estándar, y tienen una garantía sólida de cuatro años con el registro por Internet.

Principales ventajas

- 4 años de garantía¹⁾
- Duración hasta 4 veces más larga²⁾
- Hasta 100.000 km de vida útil³⁾
- Más durabilidad y ciclo de reemplazo más largo
- Diseño moderno con una tapa de plata (H4/H7/H11), ideal para los faros de cristal transparente
- Amplia gama de focos de iluminación frontal y auxiliares

1) 4to año con el registro de productos por Internet. Acceda a www.osram.com/am-guarantee para conocer las condiciones precisas

2) Comparado con focos estándar | 3) Con un kilometraje medio anual de 14.259 km y un 60% del tiempo de la luz encendida |

4) Focos ámbar para luces indicadoras con cristal transparente

OSRAM LÍNEA ORIGINAL 12V

Calidad de OEM

Rendimiento máximo para las necesidades estándar, robusta y rentable: Utilizada con éxito en millones de coches nuevos de fabricantes de renombre, ya sea como un equipo inicial de serie o piezas de repuesto originales.

Principales ventajas

- Repuesto original
- Excelente relación entre calidad y precio
- Brillo y fiabilidad impresionantes

1) El tipo sucesor del foco BILUX®-AS® (referencia 7951)

2) Focos ámbar para luces indicadoras transparentes

3) También disponible con una base de vidrio (código del producto 6411150 o 6411350)

El sufijo en el código del producto indica el grosor del tablero:

MFX6: 1.5 mm

MF: 2.0 mm

MFX: 1.5 mm

Focos de xenón para faros Fascinantemente brillantes

Los focos de xenón de OSRAM generan hasta un 70% más luz que los focos halógenos, con impresionantes temperaturas de color, consumo de energía significativamente menor y una vida útil más larga. Los conceptos de iluminación de xenón vanguardistas de OSRAM, sin embargo, brindan mucho más que el confort de conducción, realzando el estilo personal y la demostración de la conciencia ambiental individual. Son adecuadas para coches, camiones, autobuses y vehículos comerciales.

Programa de Confianza de OSRAM

Verifique los focos de xenón originales de OSRAM

OSRAM se esfuerza por ofrecer productos de primera calidad, un hecho que ha llamado la atención de los fabricantes que inundan el mercado con falsificaciones. Esto no es sólo una cuestión económica, sino una que pone en juego la seguridad del cliente. El Programa de Confianza de OSRAM ayuda a los clientes a verificar los productos de xenón originales de OSRAM.

Por qué lo correcto es siempre confiar en OSRAM

Ya existe un cierto número de focos falsificados en circulación, y muchas de ellas afirman ser focos OSRAM XENARC®. Algunas de esas falsificaciones son fáciles de detectar. Pero algunas son tan hábilmente falsificadas que incluso el ojo de un profesional no logra detectar la diferencia.

Por eso hemos puesto en marcha un proceso de seguridad en 2 pasos. Es fácil de usar y asegura que usted logrará los resultados en cuestión de segundos.

Focos OSRAM XENARC®

- XENARC® NIGHT BREAKER® UNLIMITED
- XENARC® COOL BLUE® INTENSE
- XENARC® ULTRA LIFE
- XENARC® ORIGINAL

Recursos de seguridad

Una parte del Programa de Confianza de OSRAM es implementar dos recursos de seguridad en el proceso de fabricación. A partir de los productos OSRAM XENARC®, usted puede verificar sus focos usando las dos características de seguridad siguientes:

Código de la etiqueta del empaque

Todos los empaques originales de OSRAM xenón llevan un código exclusivo de 7 dígitos en la etiqueta **a** pegada, cuyos 3 últimos dígitos se pueden ver como un holograma en la esquina inferior derecha **b**. Enseguida, usted verá una tira de seguridad con un micro texto que se puede leer con una lupa **c**. Finalmente, hay un logotipo de OSRAM, el URL www.osram.com/trust y un código QR que lleva a nuestro sitio web del Programa de Confianza de OSRAM.

Datos exclusivos en cada foco.

Cada etiqueta de seguridad se asigna a exactamente un foco durante el proceso de fabricación. Usted puede encontrar los datos exclusivos del foco sobre la base.

Herramienta de verificación en Internet

Esta es la parte 2 del Programa de Confianza de OSRAM. Le recomendamos enfáticamente que experimente los siguientes pasos dos o tres veces consecutivas. Es rápido y sencillo:

www.osram.com/trust

1 Introduzca el código de 7 dígitos de la etiqueta

En la página osram.com/trust, elija la pestaña “Verifique su producto”, entonces introduzca el código de 7 dígitos de la etiqueta del empaque. Si usted lee un código QR directamente desde el empaque, el código de 7 dígitos en la etiqueta ya se auto-llenará.

2 Verifique los datos del foco.

Después de que su código de 7 dígitos de la etiqueta haya sido verificado, se le pedirá que compruebe si los datos del foco presentados automáticamente coinciden con los datos que se muestran en la base.

OSRAM XENARC® NIGHT BREAKER® UNLIMITED

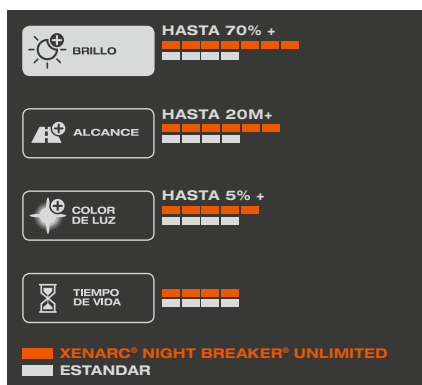

La luz más brillante de xenón de OSRAM

Con hasta un 70% más luz en la carretera, estos excepcionales focos para faros vienen con una luz de xenón aún más blanca y un haz de hasta 20 metros más largo que los focos de xenón estándar.

Principales ventajas

- Hasta un 70% más luz¹⁾ para una mejor visibilidad y tiempos de reacción significativamente más cortos
- Haz de luz hasta 20 m más largo²⁾
- Luz hasta un 5% más blanca¹⁾
- Temperaturas de color hasta 4.300 K

1) En comparación con los focos de xenón estándar

2) Dependiendo del sistema de faros

3) Accionar únicamente con un equipo electrónico aprobado

4) Los focos XENARC® deben ser reemplazados por un mecánico cualificado

5) Menor emisión de UV | Para faros de proyección | aprobación de ECE y la etiqueta DOT

6) ± 450 lm

OSRAM XENARC® COOL BLUE® INTENSE

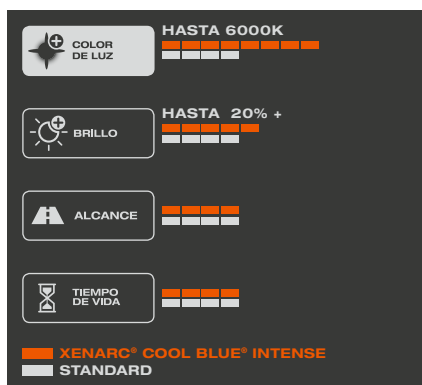

Luz de xenón extra azul

Excepcionalmente brillante, de alto contraste y de un azul brillante, con un máximo de 6,000 K: innovadora luz de xenón con una tecnología altamente eficiente, efecto brillante y un diseño impecable.

Principales ventajas

- Luz extra azul¹⁾
- Temperaturas de color hasta 6,000 K
- Hasta un 20% más luz²⁾
- Excepcionalmente brillante
- Apariencia más elegante y moderna en la carretera

1) De un sistema de llenado especial en lugar de un revestimiento convencional

2) En comparación con los focos de descarga de gas con recubrimiento estándar

3) Accionar únicamente con un equipo electrónico aprobado

4) Los focos XENARC® deben ser reemplazados por un mecánico cualificado

5) Menor emisión de UV | Para faros de proyección | aprobación de ECE y la etiqueta DOT

6) Menor emisión de UV | Con una tira anti-reflejo para los faros reflectores | aprobación de ECE y la etiqueta DOT

7) ± 450 lm

8) Hasta

OSRAM XENARC® ULTRA LIFE

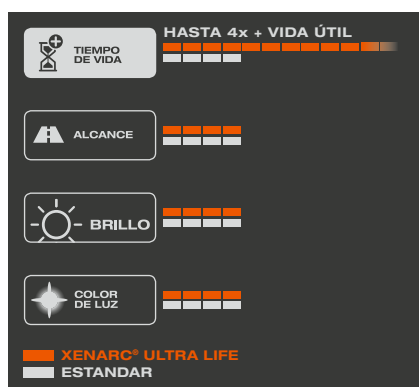

Duración más larga y diez años de garantía

Para mayor fiabilidad y comodidad: Con hasta cuatro veces la vida útil de un foco estándar, los focos para faros delanteros XENARC® ULTRA LIFE vienen con una garantía de diez años.

Principales ventajas

- 10 años de garantía¹⁾
- Vida útil hasta 4 veces mayor²⁾
- Hasta 300.000 km de vida útil³⁾
- Más durabilidad y ciclo de reemplazo más largo

OSRAM XENARC® ORIGINAL

Cuatro años de garantía

Con hasta 4.500 K, más cerca de la temperatura de color de la luz natural que la luz halógena convencional (3.200 K) y, por lo tanto, más cómoda para los ojos. Utilizada con éxito en millones de automóviles nuevos de fabricantes de renombre. La última innovación, siendo OSRAM el único fabricante en todo el mundo: la D8S, completamente sin mercurio y con un consumo de energía de sólo 25 W.

Principales ventajas

- 4 años de garantía¹⁾
- Calidad de OEM
- Brillo y fiabilidad impresionantes

Focos halógenas para motocicletas: la seguridad en primer lugar.

Las motocicletas, o las scooters son a menudo pasados por alto en el tráfico, especialmente por la noche. La iluminación adecuada puede salvar vidas. Los conductores de vehículos motorizados de dos ruedas valoran los focos de OSRAM para motocicletas por su alto rendimiento y su alta resistencia a las vibraciones, demostrados en las pruebas. Los focos halógenos de faros OSRAM mejoran la iluminación en las carreteras y brindan más tiempo de reacción en caso de una emergencia. Junto con una mayor seguridad, OSRAM ofrece a los motociclistas una amplia variedad de opciones de personalización, entre diseño, rendimiento y la gama original.

Focos OSRAM para motocicletas

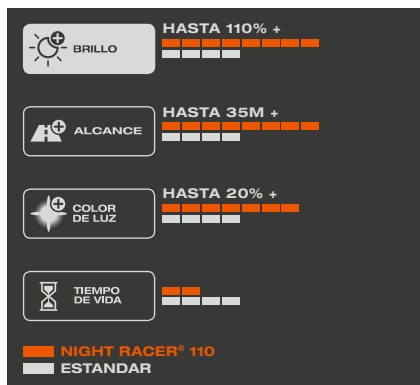

Tecnología resistente a las vibraciones

Potencia y emoción, para conductores relajados y deportivos: Con NIGHT RACER® 110, NIGHT RACER® 90, NIGHT RACER® 50, X-RACER® y ORIGINAL, OSRAM ofrece una amplia gama de focos de alto rendimiento para motocicletas, que abren una nueva dimensión para la vida sobre dos ruedas.

Principales ventajas de NIGHT RACER® 110

- Tecnología resistente a las vibraciones
- Hasta un 110% más luz en la carretera¹⁾
- Haz de luz hasta 40 m más largo¹⁾
- Luz hasta un 20% más blanca¹⁾
- Diseño llamativo con un revestimiento parcial azul y una tapa de plata

1) Comparado con los focos estandar

Focos halógenas para autobuses y camiones. Durabilidad extrema, altísimo rendimiento.

A menudo, se llevan los focos para camiones y vehículos comerciales en uso diario a su límite de rendimiento. Por lo tanto, los sistemas de iluminación deben ser enormemente duraderos y extremadamente fiables; sólo entonces pueden proporcionar una luz perfecta hasta el final de cada carrera. La larguísima vida útil de las soluciones de alto rendimiento de OSRAM mejora el confort de la conducción y reduce el tiempo de mantenimiento y los costes de la flota.

Los conductores de vehículos y los gestores de flotas pueden elegir entre una amplia gama de focos de alto rendimiento de OSRAM para camiones. Todas las soluciones de iluminación no sólo atienden a los más altos requisitos de calidad y ofrecen calidad de OEM, sino también superan incluso los estándares europeos.

OSRAM TRUCKSTAR® PRO

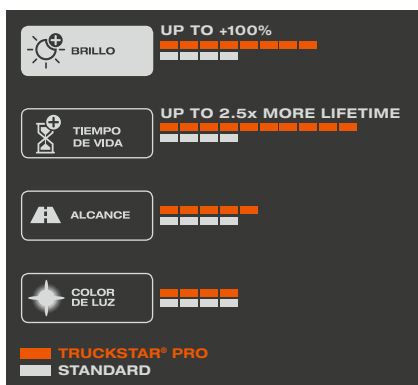

La más brillante luz halógena de OSRAM para camiones

Hasta un 100% más luz que los focos estándar, una vida útil extremadamente larga y una altísima resistencia a las vibraciones son ideales para los conductores profesionales, al tiempo que reducen el tiempo de inactividad y los costes de la flota.

Principales ventajas

- Hasta un 100% más luz¹⁾
- Más que el doble de la vida útil¹⁾
Mejora de la iluminación de la carretera
- Excelente relación entre calidad y precio
- Brillo y fiabilidad impresionantes
- Adecuada para aplicaciones de servicio pesado gracias a su alta resistencia a las vibraciones

Focos para uso fuera de carretera. Mejor luz, incluso fuera del camino.¹⁾

Ya sea para servicios de emergencia, construcción y transporte, agricultura y silvicultura, o para un entusiasta de off-road, la conducción fuera de carretera exige todo de los sistemas de iluminación. Gracias a muchos años de experiencia en la conducción en off-road, OSRAM sabe exactamente lo que quieren estos conductores. Además de robustez, resistencia y estabilidad, quieren sobre todo un rendimiento de iluminación excepcional y fiable. La respuesta es una sólida gama de focos para off-road de OSRAM, con una alta potencia que impresiona con su excelente brillo y alta temperatura de color absolutamente en cualquier entorno.

1) Estos productos no llevan la aprobación de ECE. Ello significa que no se pueden instalar en los faros "normales" o faros extras si el vehículo se va a utilizar en la vía pública.

Focos OSRAM OFF-ROAD

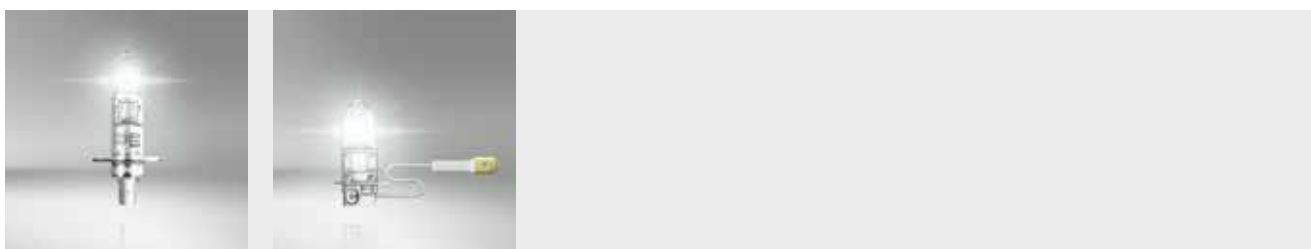

Brillo excelente para uso en off-road

Con una sólida gama de focos para off-road, de alta potencia, OSRAM ofrece soluciones incluso para los requisitos más inusuales. Todos los focos se diseñan y se designan solamente para el uso en off-road, y no se permiten en la vía pública¹⁾.

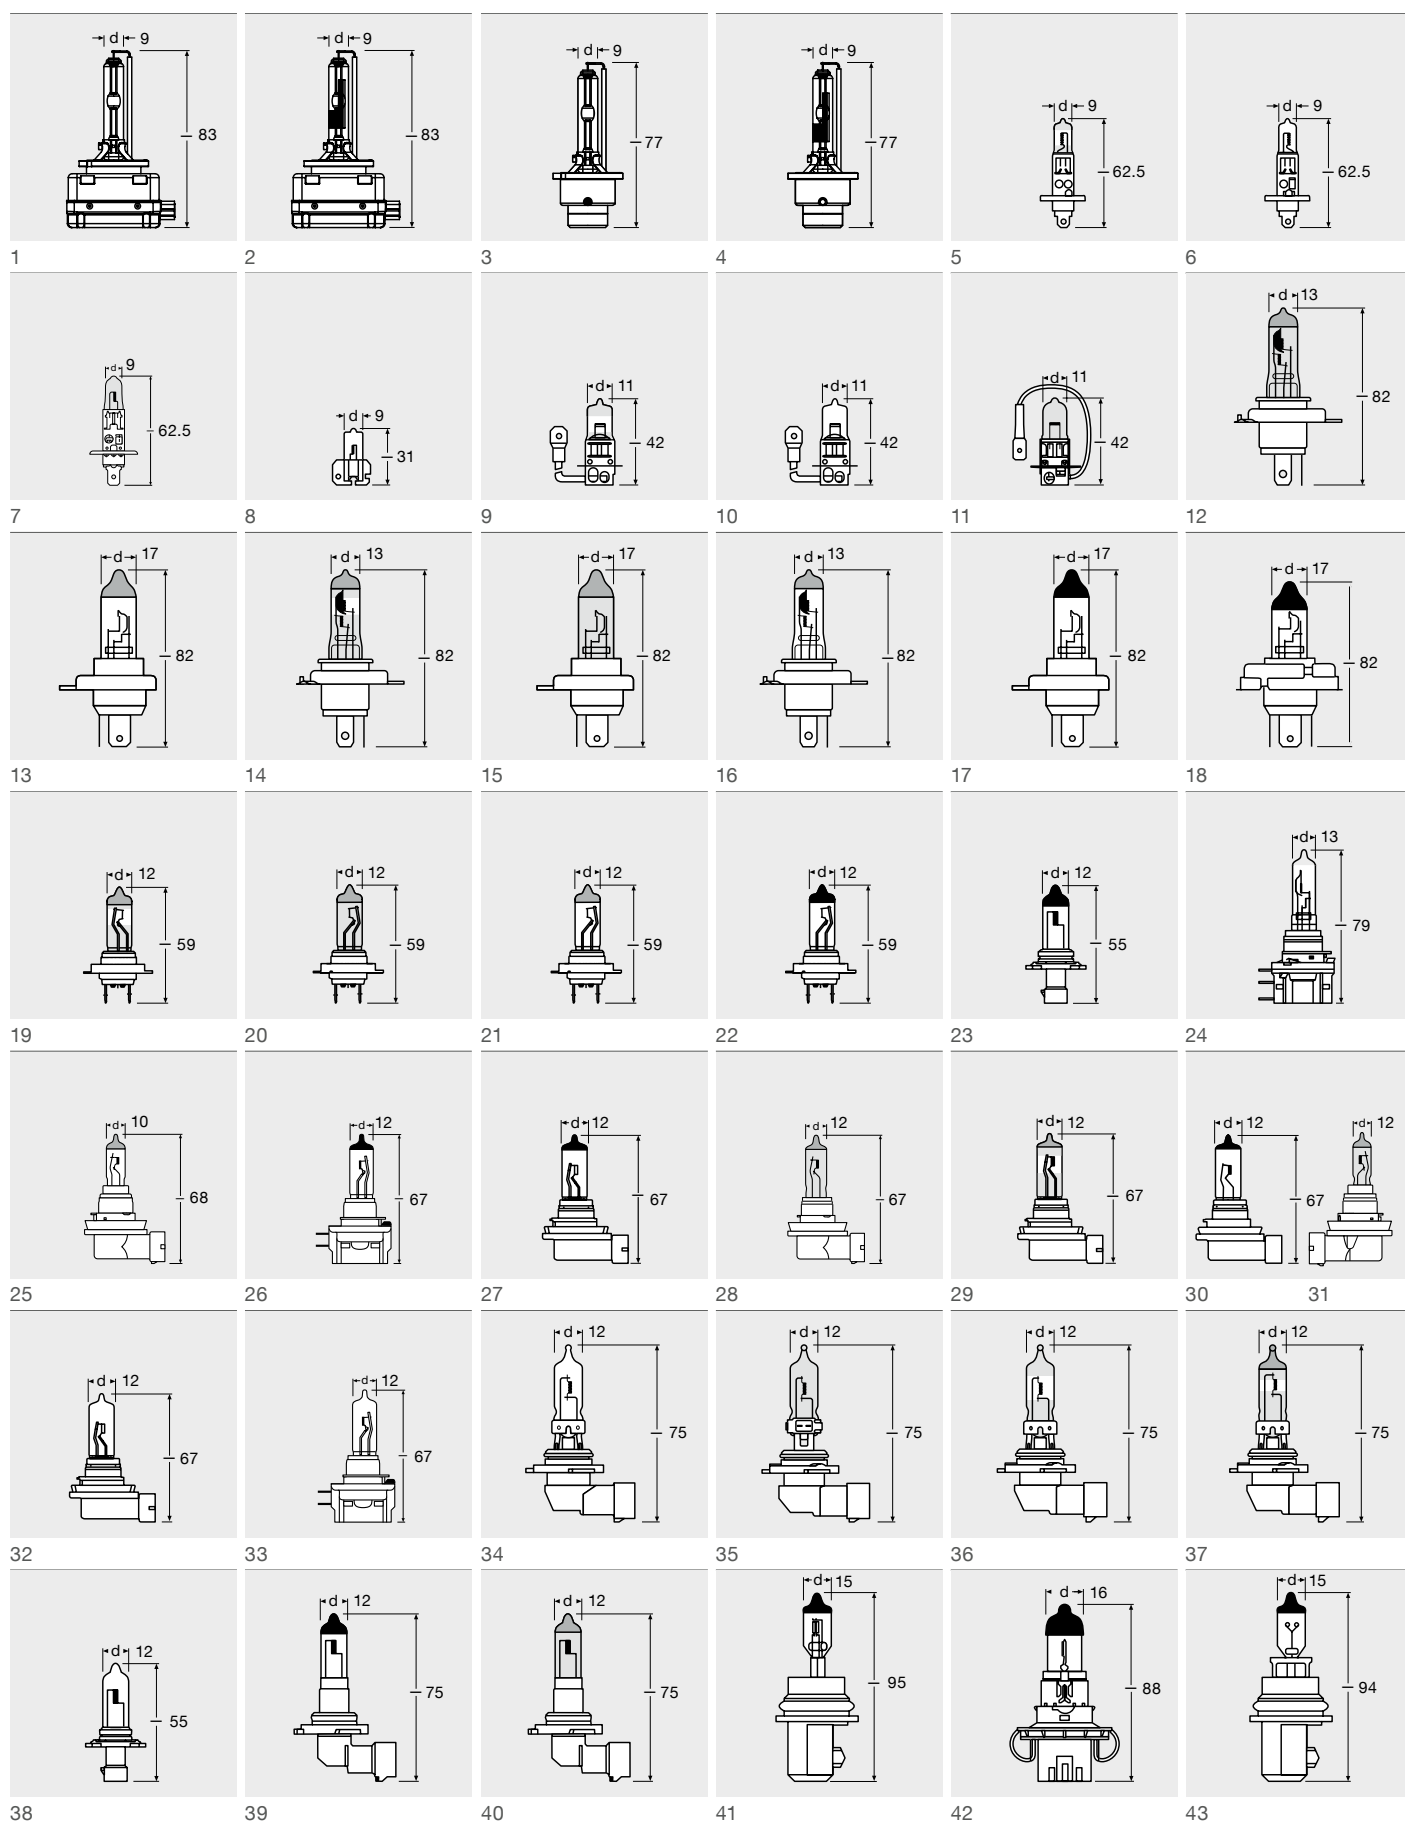

Principales ventajas de SUPER BRIGHT/PREMIUM¹⁾

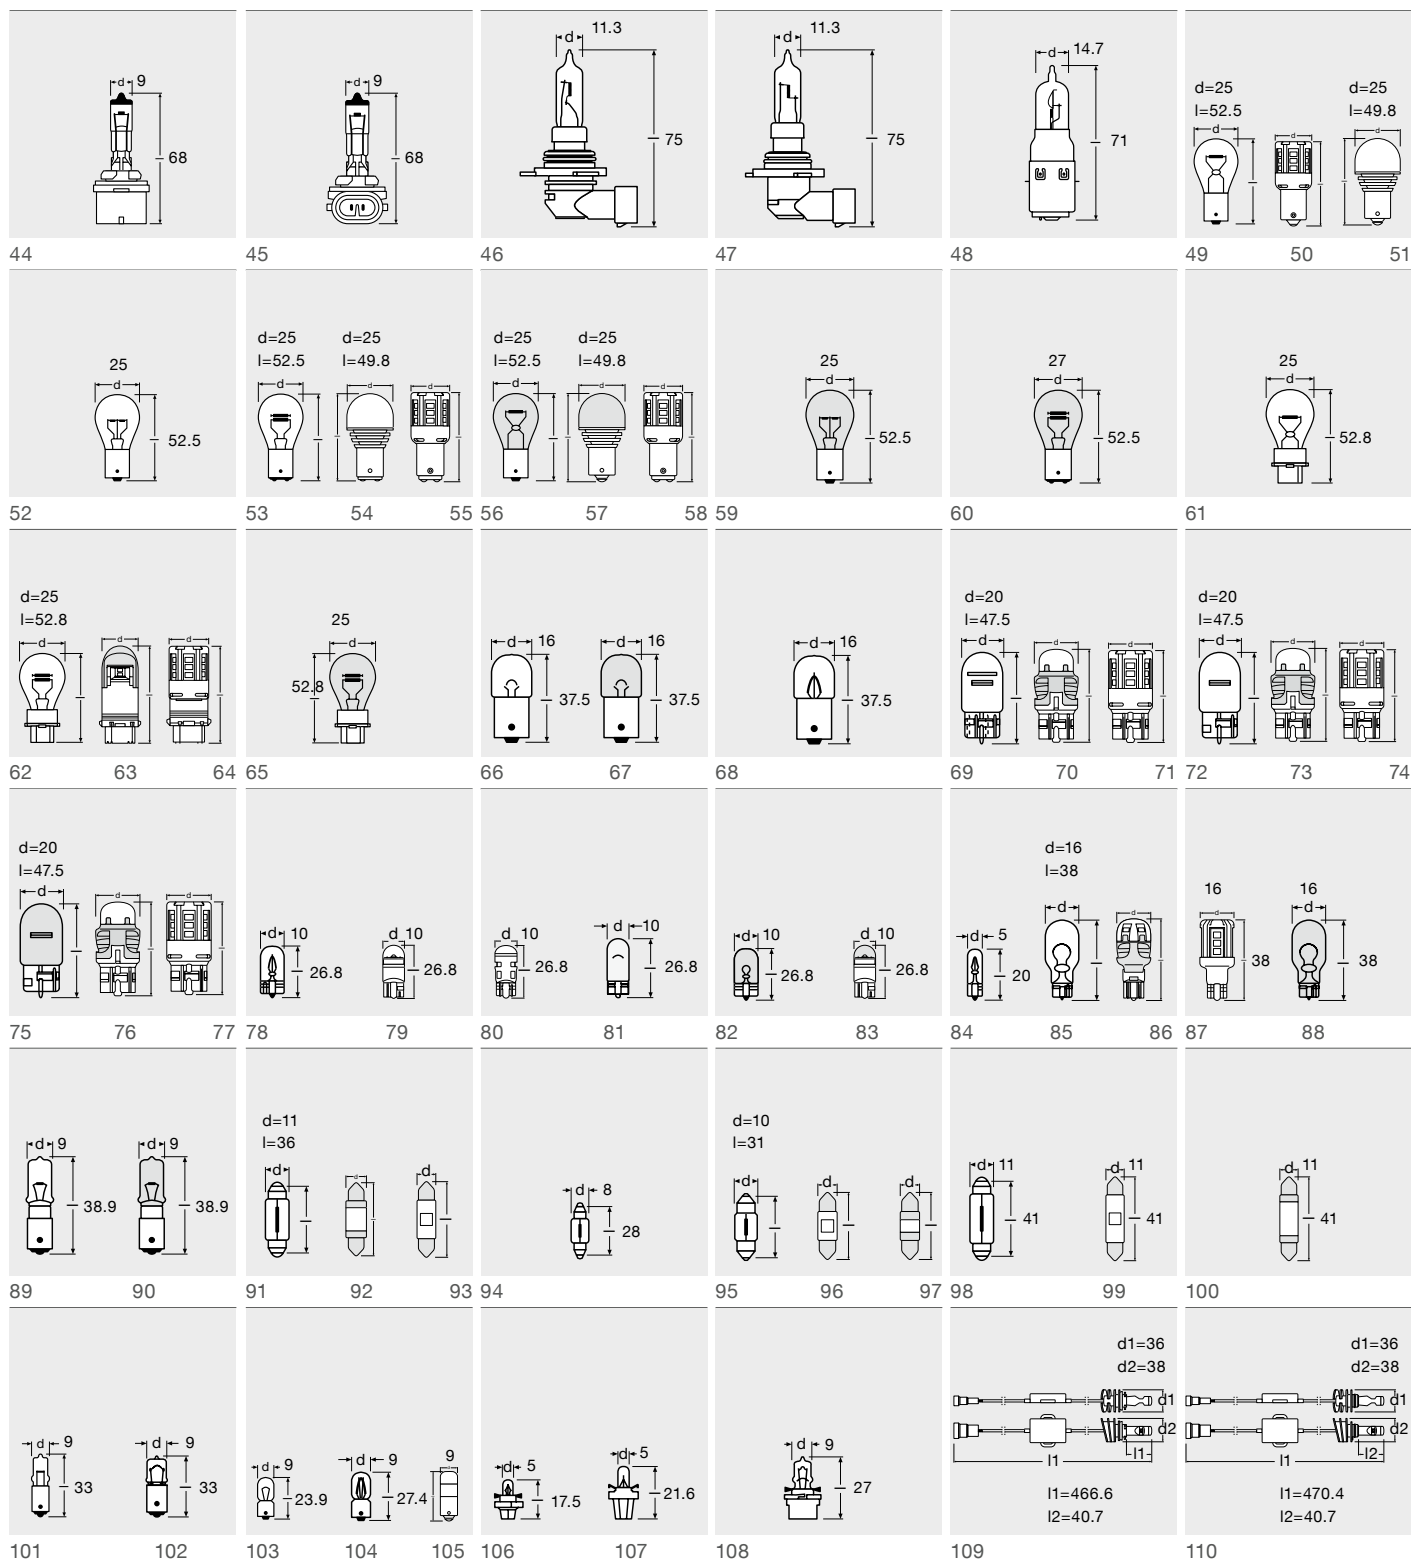

- Robustas y versátiles
- Excelente luminosidad incluso en los terrenos más difíciles: servicios de socorro, construcción y transporte, agricultura y silvicultura
- Gama con todos los tipos de bases estándares
- Tenga en cuenta: Estos focos no están aprobadas para su uso en las vías públicas. El uso en las vías públicas implica la cancelación de la licencia de operación y la pérdida de la cobertura de seguro

1) ¿Qué significan B3 y Tc en relación con la vida útil de los focos? Si consideramos la vida útil de los productos diseñados para durar un cierto tiempo, podemos ver que todos tienen características de falla idénticas o semejantes. Si trazamos las vidas útiles de cada foco en gráfico logarítmico especial, la gráfica producida se llamará "Curva de distribución de Weibull". En un proceso de producción estable, obtenemos una línea recta para la vida útil, a través de la cual podemos leer varios valores de vida útil. Para sus productos en el sector automotriz, OSRAM especifica un valor B3, que indica el momento en que el 3% de las bombillas probadas han fallado. OSRAM también especifica el valor Tc (valor característico de Weibull), que indica el tiempo en que el 63,2% de las bombillas han fallado. Anteriormente, sólo se especificaba el valor medio (la vida útil media), que, en este sistema, correspondería a un valor B50 (es decir, el tiempo en que el 50% de las bombillas han fallado). Especificando tanto el valor B3 como el valor Tc, es posible tener una idea de la propagación de la vida útil del producto y, por lo tanto, de la calidad del producto.

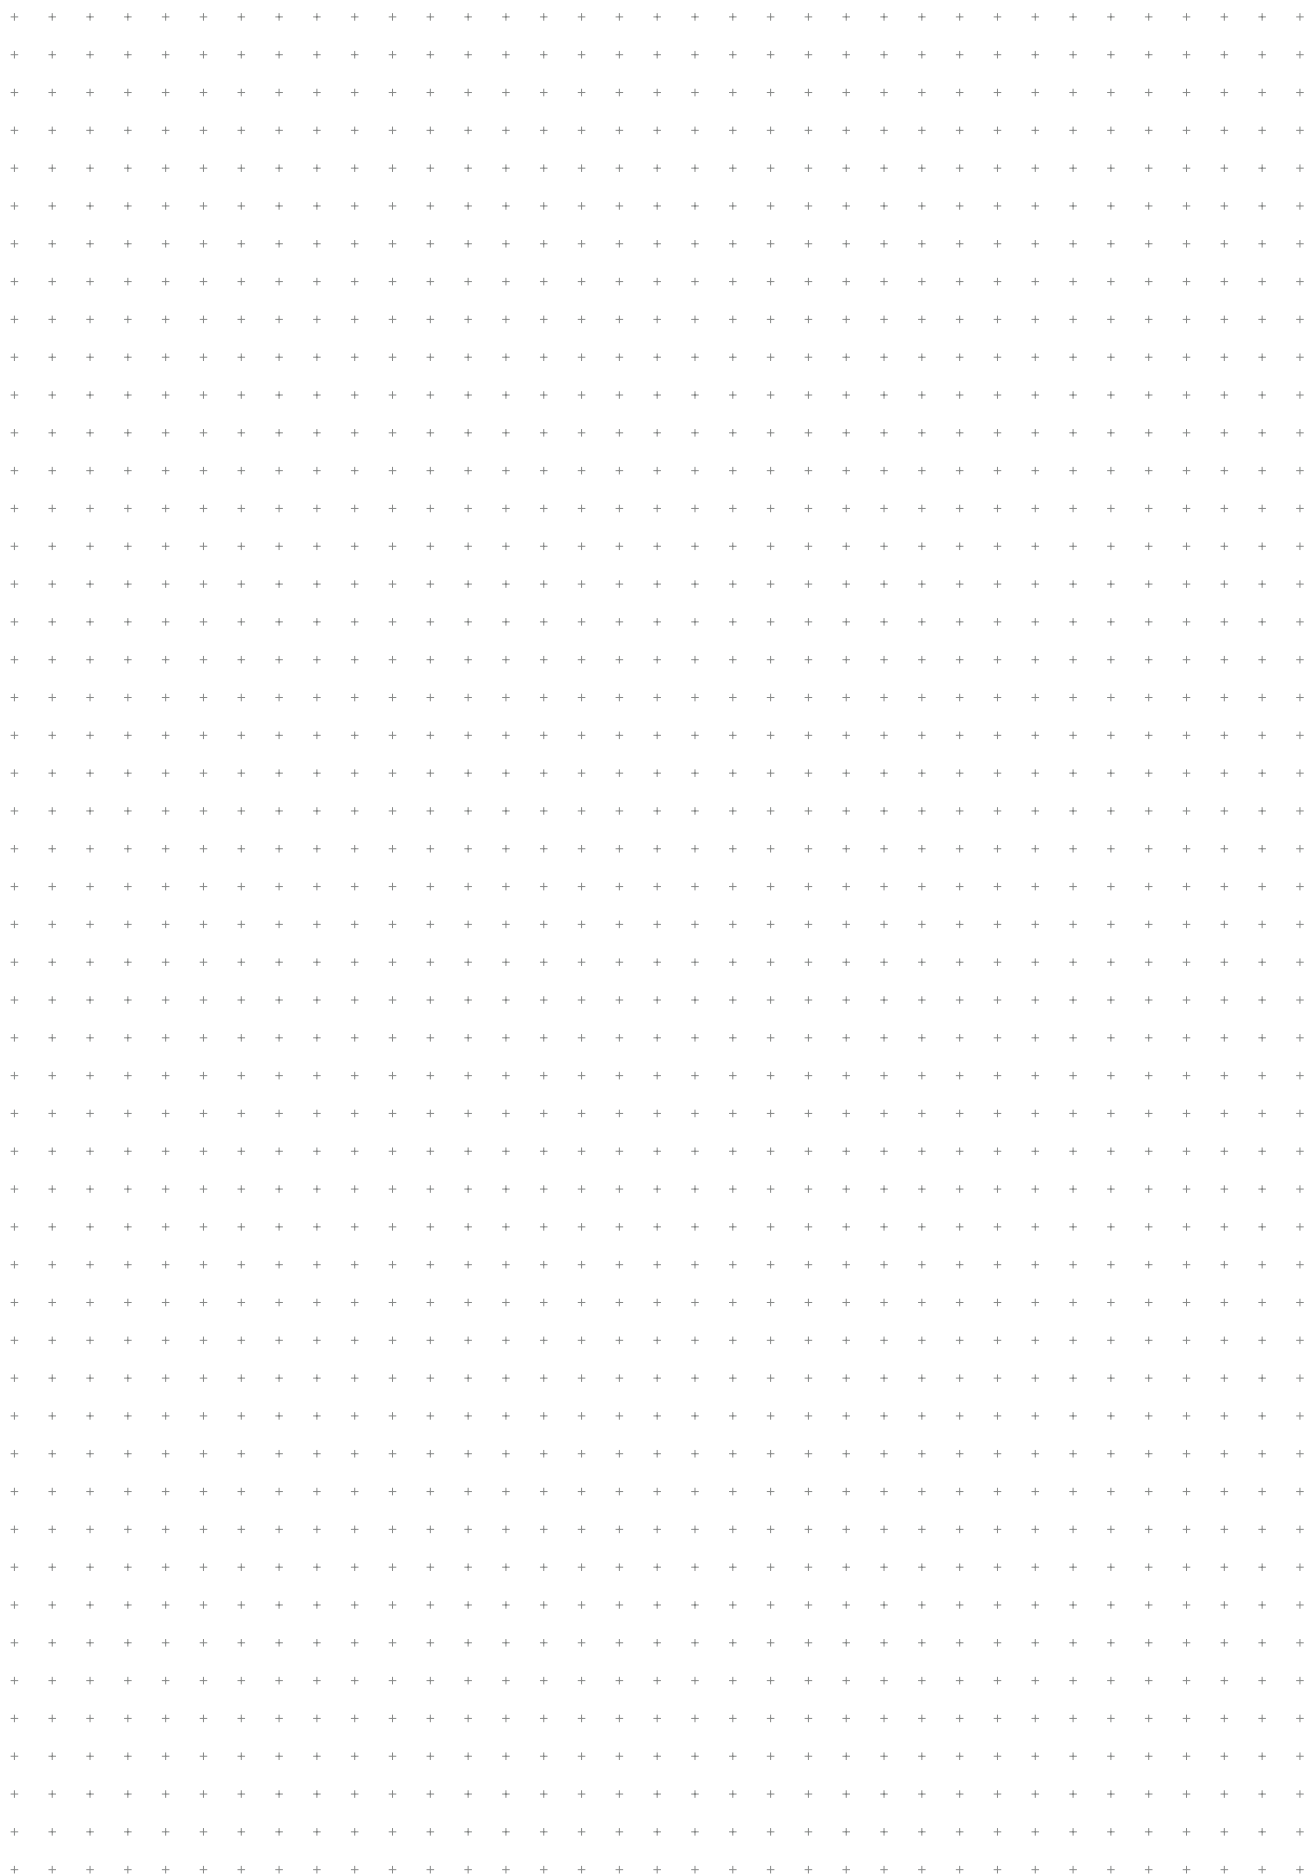

Explicación: foco de filamento único ej. 100/300 | Foco de doble filamento ej. 100/300/500/100

T_c

2) OFF-ROAD sólo cuando se utiliza en una aplicación exterior. Estos productos no llevan la aprobación de ECE. Esto significa que no pueden instalarse en luces externas si se va a utilizar el vehículo en vías públicas.

3) Estos productos no llevan la aprobación de ECE. Ello significa que no se pueden instalar en los faros "normales" o faros extras si el vehículo se va a utilizar en la vía pública.
